Fidelity Penalty from Unknown Target State
Naive (no estimation) (dephasing)
Noise-channel inversion (dephasing)
Coherence maximization (dephasing)
Iterative refinement (dephasing)
Multi-copy tomography (dephasing)
Naive (no estimation) (depolarizing)
Noise-channel inversion (depolarizing)
Coherence maximization (depolarizing)
Iterative refinement (depolarizing)
Multi-copy tomography (depolarizing)
Naive (no estimation) (amplitude_damping)
Noise-channel inversion (amplitude_damping)
Coherence maximization (amplitude_damping)
Iterative refinement (amplitude_damping)
Multi-copy tomography (amplitude_damping)
