Hybrid Strategy: Channel-Inversion + Coherence-Max
(10 Haar-random states/dim, combined noise)
(a) Hybrid strategy: F_{rec} vs w
Recovery fidelity F_{rec}
Mixing weight w
d=4
d=8
d=16
d=32
d=64
$\hat{\rho} = w \cdot \hat{\rho}_{inv} + (1-w) \cdot \hat{\rho}_{coh}$
(b) Optimal hybrid weight vs dimension
Optimal weight w^*
Optimal fidelity F^*
Hilbert space dimension d
w^*
F^*
